

MARSIM 2000

Table of Contents

Joint Titles

Classification of Maritime Simulators, the Final Attempt Introducing DNV's New Standard

Stephen Cross
Martin Olofsson

Training Titles

Evaluating Simulators for Use in Assessment of Mariner Proficiencies

Myriam Witkin Smith
Marvin C. McCallum

Maritime Simulation Training for Nuclear Power Operators

Harry J. Crooks
Douglas Pierce

Developing Industrial Competencies through Virtual Environments

M. C. Newton

Engine Room Resource Management Using a Full Mission Simulator

Dwight Hutchinson

Applications of Interactive Tug Simulation

J. H. Vulder
W. Hoebee
A. J. Kooren
D. G. Ramsey
R. Wenz

Prediction Information to Improve Navigational Performance

Leo van Breda

Simulation of Tug - VLCC Operations in Training on Ship Handling Using Manned Models

Lech Kobylinski
Jacek Nowicki

CAORF Ship Operation Center (SOC) - Recent Advances in Marine Engine and Deck Simulation at the Computer Aided Operations Research Facility (CAORF)

Joseph J. Puglisi
Jack Case
George Webster

VTS Operator Testing: Selection Methodology and Situation Awareness

Erik Wiersma
Wim van Padje
Rene Butter
Dominic Jarvis

New Programmatic Approaches to Modeling and Maintaining Maritime Simulation Databases

Will Richards

Tugs Simulation More Than Mooring Assistance Alone

Johan de Jong

A Computer-Based Testbed for Designing the Control of Vertical Motions of a Fast Ferry

Segundo Esteban
Jose M. Giron-Sierra
Bonifacio de Andres Toro
Jesus M. de la Cruz

Shiphandling Simulators Validity. Validation and Correction Of Mathematical Models

A. D. Gofman
V. M. Manin

A Study on the Systematic Validation of the Ship Handling Simulator's Function Corresponding Nautical Missions

Yasuo Arai
Shiro Arai
Hiroaki Kobayashi
Makoto Endo
Masanori Endo
Hiroyuki Mizuno
Masanori Tsugane
Syoichi Senda
Shin Murata
Tomoki Oku

Applying Virtual Environment Technology to the Development of Shiphandling Navigation Displays

Elizabeth Sheldon
James E. Patrey
Robert B. Breaux

Simulator Experiments for Developing a Navigation Support System

Junji Fukuto
Masayoshi Numano

Effective Procedure for Improvement of Light Aids to Navigation through Simulator Experiments

Keiko Miyazaki
Masayoshi Numano
Kunihiki Tanaka
Yoji Murohara
Tadatsugi Okazaki
Junji Fukuto
Yasuyuki Niwa
Masato Takahashi

Smart Approach to Developing and Optimizing Maritime Simulation Databases by Open-GIS Technologies

Changmin Lee
Hanjin Lee
Inyoung Gong
Sunhee Park
Geewon Yun

New Standards of MET using Ship Handling Simulator

Hiroaki Kobayashi
Makato Endo
Yasuo Arai
Shin Murato
Takahiro Takemoto
Susumu Toya
Shoichi Senda
Hiroyuki Mizuno
Masatoshi Endo
Michio Hayashi

**Seeking a Common Approach to the Use of Marine Simulators for the Training of Seafarers-
Can Current and Planned Research in Europe Provide an Answer?**

Peter Muirhead

**Features Important for Simulator Training with Emphasis on the Own Ship Mathematical
Model**

Peter Sorensen
Jacob Petersen
Jens Romeling

Ice Navigation Simulator

Robert L. Wolfe

Star Cruises Ship Simulator

Gustaf Gronberg

Maneuvering Titles

**An Element-Type Mathematical Model Derived From a Simplified 3D Vortex System on Ship-
Hull Hydrodynamic Forces During Slow-Speed Maneuvering Motion**

Keiichi Karasuno
Kazuyoshi Maekawa
Yasuo Saito
Hiroshi Ikeda

Numerical Simulation of Air Craft Dynamics

Konstantin I Marveev

On-line Identification of Maneuvering Indices by Using IIR Filters

Tosho Iseki
Kohei Ohtsu

**Improved Ship Maneuvering Assessment Based on Integration of Advanced Modeling
Techniques**

Bent K. Jakobsen
Jacek Mazurkiewicz
Vladimir Ankudinov

Prototype Measurement of Ship Sinkage in Confined Water

Vlafaimir Ankudinov
Larry Daggett
Bent K. Jakobsen
J. Christopher Hewlett

Simulation of Local Cross Current on a Ship in Restricted Mixed Water

W. Hobee
J. H. Wulder
J. Mustsaers

**A Study on Ship Maneuvering Characteristics of Ship with Twin-propellers and Twin-
rudders in Shallow Water - On the Harbor Maneuvering at Low Speed Range**

Atushi Ishibash
Hiroaki Kobayashi

**Measurements and Predictions of Wave Response and Vertical Underkeel Clearance in New
York Harbor**

Randy McCollum
Vladimir K. Ankudinov

Simulation Modeling for Operations in a Littoral Environment

Bent Jackobsen
Jacek Mazurkiewicz
Eugene R. Miller

Simple Estimating Method on Ship Maneuverability by Means of Maneuvering Performance Database

Tomihiko Haraguchi

Cape Fear River Channel Improvement Study

Dennis W. Webb

Brian Long

Bruce Fuchs

David Leitch

Calculation of Hydrodynamic Forces Acting on a Ship in Maneuvering Motion

Koji Nonaka

Hideki Miyazaki

Tadashi Nimura

Michio Ueno

Takanori Hino

Yoshiaki Kodama

Development of Shiphandling Simulator by Object Oriented Software Design

Teresa Hatch

Terry O'Brien

A Method of Predicting Squat Based on Full Scale Validation

Dick J. Engelbracht

Michelle Nieuwenhuis

Amanda Tijben

Shiphandling Simulator Study for Boryoung Harbor Design

In-Young Gong

Jin-Whan Kim

Han-Jin Lee

Yeon-Gyu Kim

Sun-Young Kim

Chang-Min Lee

On the Approximate Expression for Hydrodynamic Forces in Ship Maneuvering Motion

Katusro Kijima

Yasuaki Nakiri

Effects of Stern Hull Form on the Maneuverability for a Tanker

Sun-Young Kim

Yeon-Gyu Kim

The Simulation of Tanker Escorting with Integrated Tug-Vessel Shiphandling Simulator

Jussi Martio

Kai Happonen

A New Approach of Anchoring VLC's in Current or Tidal Stream

Max J. van Hilten

Criteria for Yaw-checking and Course-keeping Abilities in IMO's Interim Standards for Ship Maneuverability

Yasuo Yoshimura

Kunji Kose

Tomihiko Haraguchi

Prediction of Hydrodynamic Forces from a Database of Maneuvering Hydrodynamic Derivatives

Jakob Buus Peterson

Bo Lauridsen

Captive Maneuvering Tests with Ship Models: A Review of Actual Practice, Based on the 22nd ITTC Maneuvering Committee Questionnaire

Marc Vantorre

On the Standard Deceleration of Ship Speed by Human Control

Shoichi Senda
Hiroaki Kobayashi

On the Ship Maneuverability Dynamic Criteria

Marina Lebedeva

System Dynamics Simulation Model of the Marine Steam Turbine-Drive Generating Set

Ante Munitic
Luko Milic
Matko Bupic

Background Titles

On Short Waves Around Ships in Maneuvering Motion

Michio Ueno

Are Multi-User Virtual Environments a Panacea for Maritime Simulation Training?

David Garfield

Minimum Time Maneuvering Methods and Simulator System

Kohei Ohtsu
Tadatsugi Okazaki
Kimikazu Shoji
Tetuo Tasaki

On the Squat Phenomena in Limited and Variable Depth Areas

M. A. Herreros
R. Zamora
L. Perez Rojas

Shore-Based Pilotage - Simulators and Operational Research

Henk Regelink
Johan H. Wulder

Development of Distance Learning for the Education and Training of ECDIS Operators

P. Hailwood

On the Width of Waterway for the Ship Controlled by Human Operator

Hiroyuki Mizuno
Hiroaki Kobayashi

Development of Integrated Navigation Monitoring and Training System for ROV and Underwater Working Devices Using Virtual Reality and Simulation Technology

Changmin Lee
Hankin Lee
Chongmoo Lee
Moonjin Lee

The Ship Maneuvering System Development Applied OOA Into Human-Machine Interface

Masatoshi Endo
Hiroaki Kobayashi

On Practical Procedures for Improving Maneuvering Safety of Large Tankers in Confused Waterways and in Berth Areas

Kunji Kose
Yoshitaka Fukuo
Yasushi Ishioka
