

MARSIM 2006

Table of Contents

Keynote Papers

APPLICATION OF MARITIME SIMULATORS AND IMSF ACTIVITIES

H.Kobayashi

STCW AND ASSESSMENT OF COMPETENCE BY SIMULATOR 10 YEARS ON

P. Muirhead

S. Papers

S1. THE USE OF A SIMULATOR FOR THE DEVELOPMENT AND TRAINING OF OPTIMISED USE OF HARBOUR TUGS

Capt. Max J. van Hilten

Dr Ir. Johan H.Wulder

S2. A STUDY ON HUMAN CHARACTERISTICS IN BERTHING MANEUVER AND DEVELOPMENT OF THE SHIP HANDLING SUPPORT SYSTEM

Atsushi Ishibashi

Hiroaki Kobayashi

S3. SIMULATION OF THE DYNAMICS OF A TUG TOWING A DISABLED TANKER IN EMERGENCY SALVAGE OPERATION

K.S. Varyani

N. Barltrop

X. Pham

K. van Essen

R. Doyle

L.Speller

S4. TUG SIMULATION TRAINING – REQUEST FOR REALISM AND ACCURACY

Peter Kr. Sørensen

S5. THE SIMULATION RESULTS OF TUG OPERATION IN HARBOUR MANOEUVRING

Szymonski

S6. THE DEVELOPMENT OF SHIP SIMULATION ASSESSMENT TO COMPLEMENT WRITTEN MARITIME EXAMINATIONS IN IRELAND

Bill Kavanagh

S7. MARINER'S FUNCTION FOR SAFE NAVIGATION

Hiroaki Kobayashi

S8. UNDERSTANDING HUMAN ERROR PATTERNS BY ANALYSING SIMULATOR TRAINING RECORDS

Hideyuki Ando, Tokyo, Japan

S9. STUDY ON ON-BOARD SHIP-HANDLING SIMULATOR APPLIED REAL TIME AIS INFORMATION

Y. Arai, Japan

S10. SHIP MANEUVERING SIMULATION BASED SAFETY ANALYSIS FOR VESSEL TRAFFIC ENVIRONMENT

Jun-Min Mou

Zao-Jian Zou

Li-Wen Huang

Yong-Qing Ji

S11. THE METHOD OF NAVIGATIONAL RISK ASSESSMENT ON WATERWAYS BASED ON GENERALISED REAL TIME SIMULATION DATA

Lucjan Gucma

S12. NUMERICAL INVESTIGATION ON MOTION SICKNESS EVALUATION OF A HIGH SPEED FERRY

Dr C. C. Fang
Mr M.Y. Chen
Dr S.K. Chou

S13. FRUSTRATION AND REGRESSION – AN EXPERIMENTAL STUDY OF A PARADIGM FOR HUMAN RELIABILITY AND TRAINING

Dr Marc Schütte

S14. A STUDY ON MARINERS' BEHAVIOR FOR AVOIDING COLLISIONS IN CONGESTED TRAFFIC CONDITIONS: A STUDY ON THE CAUSES OF COLLISIONS UNDER RESTRICTED VISIBILITY

Tomohisa Nishimura
Hiroaki Kobayashi

S15. LOW COST THREE DEGREES OF FREEDOM MOTION PLATFORM FOR HIGH SPEED CRAFT SIMULATOR

Norvald Kjerstad
Webjorn Rekdalsbakken

S16. A CONCEPTUALLY NEW TYPE OF SIMULATOR FOR ADVANCED OFFSHORE OPERATIONS AND ANCHOR HANDLING

O. Bjorneseth

S17. INTEGRATION OF SHIP BRIDGE SIMULATOR AND ENGINE ROOM SIMULATOR

Trond Fykse Tveit
Jarle Thorstensen
Lars Markusson

S18. USING SHIPHANDLING BRIDGE SIMULATORS TECHNICALLY CONNECTED TO ENGINE SIMULATORS

Asc. Professor Poul Vibsig Pedersen

S19. SIMULATION OF SHIP ELECTRIC NETWORKS

H.T. Grimmelius

S20. STANDARD MARINER'S BEHAVIOR IN AVOIDING COLLISION MANEUVER

Research Group on Mariner's Factor
Hiroaki Kobayashi: Project Coordinator of IMSF research project, Japan

S21. ACCESSIBILITY STUDY OF SAN BELTRAN BASIN THROUGH NORTHERN MOUTH USING A MANOEUVRING SIMULATOR (BARCELONA PORT)

J.M. Montero
R. Atienza
O. Ortega
E. Diaz

S22. DEVELOPMENT OF AUGMENTED REALITY & VIRTUAL OCEAN ENVIRONMENT FOR ROV OPERATION AND TRAINING

C.M.Lee, Korea

S23. THE DESIGN OF AIS SIMULATION TRAINING PROGRAM FOR AIS OPERATORS

Bao Junzhong, Gu Xuehua, Dalian Maritime University, P.R. China

S24. MARITIME INCIDENT MANAGEMENT SYSTEM (MIMS)

Lt Cdr Jack Hickey
Gisle A H Fiksdal

S25. DEVELOPMENT OF ONBOARD SHIP HANDLING SIMULATOR

Hikaru Kamiirisa
Takashi Kishimoto
Masato Kikuchi
Shuji Ueki
Kazuhiko Kanehiro

S26. BRM TRAINING AND ITS QUANTITATIVE EVALUATION

Kinzo Inoue
Hiroko Takahashi
Tomoki Kuwano

S27. A STUDY ON EFFECTIVE TRAINING METHODS USING FULL-MISSION ENGINE ROOM SIMULATOR, PROPOSAL AND VERIFICATION OF ENGINE ROOM SIMULATOR TRAINING PROGRAM -

Kondo Koichi

S28. EXPERIMENTAL VERIFICATION ON GENERAL MANEUVERING METHOD BY HUMAN OPERATORS

Makoto Endo

S29. DYNAMIC BEHAVIOR OF A TANKER AND A TUG IN A RIVER

Prof. Haruzo Eda
Dr Eugene Guest
Dr Takeshi Matsuoka
Dr Hiroko Itoh

S30. DEVELOPMENT OF COLLISION AND GROUNDING RISK MONITORING SYSTEM OF A SHIP BY USING FUZZY ALGORITHM AND ENVIRONMENTAL STRESS MODEL

Nam-Sun Son
In-Young Gong
Sun-Young Kim

S31. A THREE-DIMENSIONAL VIEWING MONITOR USING NETWORK SYSTEM BETWEEN A SHIP AND THE SHORE VIA A SATELLITE

H. Usui

S32. STUDY ON SKILLS ASSESSMENT BY SIMULATOR

H. van Ginkel

S33. INTEGRATING SHIP-HANDLING AND CRISIS MANAGEMENT SIMULATORS CREATING A NEW PARADIGM

P. B. Arms

S34. FIRST RESULTS FROM PRACTICAL USAGE OF COMPLEX MARITIME SYSTEM SIMULATOR CENTRE IN CONNECTION WITH REAL EQUIPMENT

Marko Perkovic
Valter Suban
Stojan Petelin
Matej David

S35. DEVELOPING INNOVATIVE SOLUTIONS FOR EFFECTIVE SHIP-HANDLING TRAINING

Captain Ashok Mulloth
Mr Prakash Xavier

M. Papers

M1. SHIP-SHIP-INTERACTION: OVERTAKING AND ENCOUNTERING OF INLAND VESSELS ON SHALLOW WATER

Dr Andreas Gronarz

M2. SHIP MANOEUVRING CHARACTERISTICS AS FUNCTION OF SHIP FORM IN SHALLOW WATER

Sungwook Lee
Katsuro Kijima
Yoshitaka Furukawa
Yasuaki Nakiri

M3. PREDICTION OF SHIP MANOEUVRABILITY OF AN 800 TEU CONTAINERSHIP IN DEEP AND SHALLOW WATER: MATHEMATICAL MODELLING AND CAPTIVE MODEL TESTING

Katrien Eloot
Marc Vantorre
Guillaume Delefortrie

M4. CFD WITH PMM TEST VALIDATION FOR MANOEUVRING VLCC2 TANKER IN DEEP AND SHALLOW WATER

Claus D. Simonsen
Fred Stern, IIHR
Kristian Agdrup

M5. PERFORMANCE EVALUATION OF SCHILLING RUDDER AND MARINER RUDDER FOR PURE CAR CARRIERS (PPC) UNDER WIND CONDITION

Kazuhiko Hasegawa
Vishwanath Nagarajan
Dong-Hoon Kang

M6. TURNING MOTION OF A SHIP WITH SINGLE CPP AND SINGLE RUDDER DURING STOPPING MANEUVER UNDER WINDY CONDITION

HideoYabuki
Yasuo Yoshimura
Tsuyoshi Ishiguro
Michio Ueno

M7. A STUDY ON THE MANOEUVRABILITY OF TWIN-SKEG CONTAINER SHIP

S.Y. Kim

M8. THE APPLICATION OF REAL-TIME MANOEUVRING SIMULATOR FOR A HARBOUR DESIGN

Captain John S.Y.Chang
Dr C.C. Fang
Mr Sin Der Lee

M9. NEW CAPABILITIES FOR THE MATHEMATICAL MODELLING OF A SHIP MOTION IN NTPRO 4000 SIMULATOR

A. D. Speransky

M10. A STUDY ON MANEUVERABILITY OF VLCC INSTALLED WITH MARINER TYPE VEC-TWIN RUDDER

Dong-Hoon Kang
Kazuhiko Hasegawa
Kenjiro Nabeshima

M11. MODELLING AND SIMULATION TECHNOLOGIES FOR NAVAL SHIP DESIGN AND THEIR APPLICATION

C.H.Lee

M12. OPTIMAL INPUT DESIGN FOR THE IDENTIFICATION OF LOW-SPEED MANOEUVRING MATHEMATICAL MODEL

Seong Mo Yeon
Dong Jin Yeo
Key Pyo Rhee

M13. A UNIFIED NONLINEAR MATHEMATICAL MODEL FOR SIMULATING SHIP MANOEUVRING AND SEAKEEPING IN REGULAR WAVES

Serge Sutulo
C. Guedes Soares

M14. A NON-UNIFORM CURRENT IN SHIP MANOEUVRING

Jaroslawn Artyszuk

M15. THE MOVING MATHEMATICAL MODELS OF TUG WITH VOITH SCHNEIDER PROPELLER

Zhang Xiufeng
Yin Yong
Jin Yicheng

M16. COURSE KEEPING AND MANOEUVRING OF HIGH-SPEED VESSELS

F. Quadvlieg

M17. MODELING OF SHIP MOTIONS IN RESTRICTED CHANNELS ON MARINE SIMULATORS

Dr Vladimir Ankudinov
Igor I. Filippov

M18. MARITIME TRAFFIC SAFETY ASSESSMENT FOR BUSAN NEW PORT BY USING SHIPHANDLING SIMULATOR SYSTEM

In-Young Gong
Chan-Su Yang
Yeon-Gyu Kim
Chang-Min Lee
Young-Hun Yang
So-young Kim
Sun-A Kim

M19. COMBINING FAST-TIME SIMULATION AND AUTOMATIC ASSESSMENT FOR OPTIMISING TUNING OF SIMULATOR SHIP MODELS

K. Benedict
M. Baldauf
M. Kirchhoff
W. Koepnick
R. Eyrich

M20. STUDY ON MANEUVERING MODEL OF KAMEWA-TYPE WATERJET SHIP FOR SHIPHANDLING SIMULATOR

Junsheng Ren
Yong Yin
Xiufeng Zhang

M21. DEVELOPMENT OF MATHEMATICAL MODEL OF A VOITH SCHNEIDER TUG AND EXPERIENCE FROM ITS APPLICATION IN AN OFFSHORE SIMULATION STUDY

Kristian Agdrup
Anders S. Olsen
Dirk Jürgens

M22. CONTROLLABILITY AT TOO HIGH SPEEDS IN TOO SHALLOW WATER

Albert J. Jurgens
Arie de Jager

M23. GUIDE TO NEW GENERIC EQUATIONS FOR INTERACTION FORCES/MOMENTS BETWEEN MOORED-PASSING SHIP AND BETWEEN ENCOUNTER-OVERTAKING-OVERTAKEN SHIPS

Kamlesh S. Varyani

M24. PREDICTION OF THE MANOEUVRABILITY ON A SHIP WITH A CRP POD PROPULSION SYSTEM AND AN AUXILIARY RUDDER

Tomihiko Haraguchi
Jun Kayano
Yoshiaki Tsukada

M25. DEVELOPMENT OF CRITERIA FOR CERTIFICATION OF THE MATHEMATICAL MODELS USED BY MARINE SIMULATORS

Dr M.P. Lebedeva
Prof. A.D. Gofman
Dr Y.V. Yatsuk
A.V. Vladimirzev
S. D. Aysinov
Dr B.V. Afanasiev
Dr V.K. Ankudinov
Dr L.L. Daggett
A.C. Landsburg

M26. ON MANOEUVRING AND CONTROL OF LARGE HIGH-SPEED POD DRIVEN SHIPS IN WAVES

Zafer Ayaz
Osman Turan

M27. PREDICTION OF SHIP DYNAMIC STABILITY USING A NURBS-BASED HIGHER ORDER PANEL METHOD

Hua-Ming Wang
Zao-Jian Zou

M28. THRUSTER-THRUSTER INTERACTION FOR MANOEUVRABILITY EVALUATION

S. Reinders
H.T. Grimmelius
J.T. Ligtelijn
J. Moulijn

M29. ON THE DEVELOPMENT OF AUTOMATIC NAVIGATION SYSTEM FOR SHIPS

Yositaka Furukawa
Katsuro Kijima
Hiroshi Ibaragi

M30. STUDY ON MANEUVRING MATHEMATICAL MODEL FOR TRAWLER

Xiaofeng Sun
Yong Yin
Xiufeng Zhang

M31. COMPARATIVE MANOEUVRABILITY TESTS OF CONVENTIONAL AND POD PROPULSION FOR A GAS CARRIER

L. Kobylinski

Background Papers

B1. DEVELOPMENT OF INSTRUCTOR OPERATION SOFTWARE FOR SIMULATOR SYSTEM OF NAVAL USE

Han-Jin Lee
Chang-Min Lee
Gycong-Joong Lee
Sun-Young Kim
In-Young Gong

B2. COMPARISON OF THE FREQUENCY OF UNSAFE SHIP-HANDLING SITUATIONS AND THE FREQUENCY OF MARINE ACCIDENTS AT THE KURUSHIMA STRAIT

Masaru Yasuda

Kinzo Inoue

Hideo Usui

B3. AN EXPERIMENTAL STUDY ON THE DIRECTIONAL STABILITY OF TOWED FPSO

Heejoon Yang

Chunbeom Hong

B4. PHYSICALLY BASED MANEUVERING MODEL FOR SIMULATIONS AND TEST EVALUATIONS

Dr Vladimir Ankudinov

Bent K.Jakobsen
